# Novosibirsk ICBM Launch Site # 4 (U/C)

This Type II ICBM Launch Site is the fourth observed at the Novosibirsk Launch Complex. It is in the mid-stages of construction and is located approx. 21,600' NE of Launch Site #2 (55°22'00" N - 83°14'15" E).

Initial construction of the launch area is evident on [redacted] (Nov. 62). It is not evident on [redacted] (Sept. 62).

The subject site is oriented [redacted] from north as is Launch Site #2. Security fencing does not appear complete at time of overflight. An indistinct pattern of four (4) service roads is apparent. Separation between them from west to east is 360', 360' and 495'.

Pad separation is 1,170'. Definite pad measurements are precluded by snow cover and earth scarring. However, the snow covered earth scarring measures approx. 720' x 135' at the west pad and 495' x 135' at the east. An U/I object approx. 90' [redacted] is evident on the west pad. Two (2) drive-thru type probable missile hold buildings, each approx. 180' x 80' are in the site area (See sketch).

The center of the support facility is located approx. 3,800' SW from the center of the subject launch site. It contains twelve (12)
